Description

I present to you an extremely rare set , arched, and curved medicine-shaped vases in patinated painted beech wood,

all in a production that is certainly Italian from the period 1940 to 1950.

This set is of remarkable presence, it gives an absolutely magical effect in the perspective of a creation of taste, in the regency style these vases are only usable inside the house,

it is not possible for an exterior decoration of the garden, they are a function of decorative grandeur inside of a living room, hallway, interior of verandas, perfect for palm trees and green plants of large shapes
